

Dear Parent/Guardian,

My name is Alyssa de la Pena and I am the school nurse. In reviewing your child's health information, I noted that he/she has asthma. For your convenience, I have included with this letter a statewide form, the asthma action plan. If you are interested in keeping a supply of your child's medication at school, please have your child's doctor complete the form and sign/stamp it. You will have to sign the bottom of the form as well. I will need a supply of your child's medication in the original container from the pharmacy. When you deliver the medication, please bring in any supplies (mask/mouthpiece, nebulizer tubing) related to the administration of medication. I do have a nebulizer at the school so you do not need to send the machine if applicable.

Thank you very much. Please do not hesitate to contact me.

Sincerely,

Alyssa de la Pena, BSN, RN
School Nurse
