

June 12, 2019

Dear Families,

Beverly City School students have shown tremendous growth in both reading and math, and we want to maintain this positive momentum. Unfortunately, summer months spent without reading or practicing math set students up to struggle come September. Please join us and encourage your student to prepare for the next school year by completing their two summer assignments.

In reading, students should select at least one (1) fiction and one (1) non-fiction article from www.readworks.org/summer-reading. The packets range in levels and should be selected based on your child's interest and their grade level in September. Both packets should be turned into your child's reading teacher on the first day of school. Attached is a sample packet with articles in the event you do not have internet access.

In math, students should complete the attached math packet. The packet is designed to help students practice their fluency and maintain a math brain come September. This packet should be turned into your child's math teacher on the first day of school.

Students who arrive with their parent and both packets to Open House on Wednesday, September 4th will earn an extra five points on each assignment. We hope to see you there!

Enjoy your summer!

Sincerely,
Your Teachers
